1. (U) COMMANDER IN CHIEF'S SITUATION REPORT (CINC SITREP)

- a. (U) CINC SITREP reporting will be accomplished by Commander in Chief, US Strategic Command (USCINCSTRAT's) Support Battle Staff, beginning at start of exercise (STARTEX). Submit daily reports through end of exercise (ENDEX) in accordance with reference.
- b. (U) Information in the CINC SITREPs will be as of 2359Z, with immediate precedence and transmission to ensure arrival at the USSTRATCOM Exercise Control Group (ECG) no later than 0400Z the following day. First SITREP is due at 210400Z Oct 00.
- c. (U) The EXER/ line in the exercise CINC SITREPS will read "EXER/GLOBAL GUARDIAN 2001-2//."
- d. (U) The USSTRATCOM ECG will prepare and transmit CINC SITREP reports for those simulated and limited play CINCs.
- e. (U) The USSTRATCOM ECG may modify CINC SITREP requirements during the trans-/post-attack phases.
 - f. (U) Use the following addresses for the CINC SITREP:

TAB N TO APPENDIX 3 TO ANNEX X (GG 2001-2 EXORD) (U) FORCE PROTECTION AND ANTITERRORISM (U)

1. (U) <u>PURPOSE</u>. Provide Global Guardian (GG) 2001-2 exercise planners with guidance on the coordination and requirements of Force Protection/Antiterrorism (FP/AT) inputs into installation, task force, and unified command exercise play.

2. (U) TASKED ORGANIZATIONS

- a. (U) Headquarters USSTRATCOM, Offutt AFB, NE.
- b. (U) Task Force (TF)-124 (Airborne Communications), Tinker AFB, OK.
- c. (U) TF-134 (SSBN PAC), Pearl Harbor, HI.

- e. (U) TF-204 (Bomber), Barksdale AFB, LA.
- f. (U) TF-214 (ICBM), FE Warren AFB, WY.
- g. (U) TF-224 (Reconnaissance), Davis-Monthan AFB, AZ.
- h. (U) TF-294 (Tanker), Travis AFB, CA.

3. (U) CONCEPTS AND REQUIREMENTS

- a. (U) Force Protection is a security program designed to protect service members, civilian employees, family members, facilities, and equipment in all locations and situations. It is accomplished through planned and integrated application of combating terrorism, physical security, operations security, personal protective services, and supported by intelligence, counterintelligence, and other security programs.
- b. (U) Department of Defense (DoD) FP/AT directives require written plans from the CINC level down to the installation level for permanent operations or locations, and in operations orders (OPORDs) for temporary operations or exercises. As a minimum, these plans will include:
 - (1) (U) Procedures for enhanced antiterrorism protection.
 - (2) (U) Procedures for responding to terrorist incidents.
- c. (U) Commanders will exercise their force protection plans to determine their ability to protect personnel and assets from terrorist attack.

X-3-N-1 UNCLASSIFIED

- d. (U) USSTRATCOM/J010 is the office of primary responsibility (OPR) and USSTRATCOM/J2SS1 is the office of coordinating responsibility (OCR) for all USSTRATCOM FP/AT exercise input. A copy of all inputs which may impact the USSTRATCOM force protection posture will be forwarded to J010 for appropriate coordination.
- e. (U) Each command will appoint safety officials and controllers as needed to control force protection/antiterrorism FTX play.
- 4. (U) OBJECTIVES. Each task force/installation should develop exercise play that exercises the organization's:
- a. (U) ability to report information pertaining to threats or acts of terrorism through the chain of command or line of authority as appropriate.
- b. (U) security personnel in execution of antiterrorism responsibilities and functions, to include personnel deployed in support of exercise resources.
- c. (U) ability to execute, as a minimum, threat condition (THREATCON) levels NORMAL through CHARLIE.
- d. (U) Create and evaluate realistic terrorism inputs that provide credible exercise scenarios which incorporate facilities, equipment, personnel, and procedures into a comprehensive effort designed to provide maximum antiterrorism protection.
- e. (U) Review and evaluate post-incidence response plans to ensure continued operational readiness (i.e., mass casualty plans, evacuation plans, public affairs plans, etc.).

5. (U) PLANNING CONSIDERATIONS

- a. (U) Exercise planners are limited to the Threat Level I groups identified in Tab E to Appendix 2 of this EXORD.
- b. (U) Exercise planners are limited to the Threat Level II units from scenario enemy countries as identified in this EXORD.

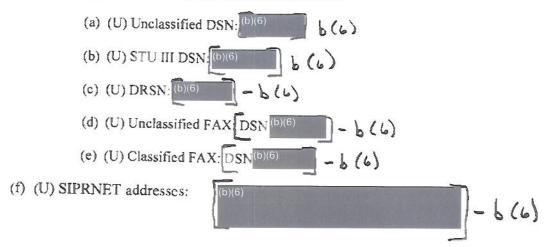

6. (U) COMMAND AND SIGNAL

- a. (U) Command
 - (1) (U) Normal command lines will be used.
- (2) (U) Role-players will set minimum Threat Condition levels for the geographic CINCs in EUCOM, PACOM, and JFCOM and for the service chiefs for CONUS installations.

X-3-N-2 UNCLASSIFIED

b. (U) Signal

- (1) (U) TFs must report their overall Threat Conditions and report subordinate installation/land based deployment site Threat Conditions by exception. TFs must report all Threat Level I/II attacks and credible threats as the situation dictates. TFs 134 and 144 should report host installation Threat Conditions and may role-play, for exercise Threat Condition purposes, the host installation commander as needed.
- (2) (U) TFs will forward a list of their command FP/AT points of contact to the USSTRATCOM Force Protection Branch/J010. The list should include 24-hour secure voice telephone numbers, unclassified telephone numbers, FAX numbers, and SIPRNET addresses as available.
 - (3) (U) J010 contact information for GG 2001-2:

APPENDIX 6 TO ANNEX X (GG 2001-2 EXORD) (U) COMMUNICATIONS PROCEDURES (U)

1. (U) <u>PURPOSE</u>. To provide communications procedures and a reference for primary points of contact during exercise execution.

2. (U) PROCEDURES

- a. (U) Exercise players will operate required communications systems in accordance with existing procedures, except as noted in this appendix. Exercise events in GG 2001-2 at no time constitute operational need to transmit classified information over non-secure systems.

 b. (U) Forward requests for exercise communications injects to (b)(6)

 [Injects must specify type of inject, method of transmission, and message content. Each inject will be reviewed and either accepted or rejected within 3 duty days of receipt. The inject will be included in the Master Scenario Events List (MSEL) if accepted.
- c. (U) This EXORD does not supersede existing procedures. Systems or procedures normally restricted from exercise (peacetime) use will not be used during GG 2001-2. If these instructions conflict with established restrictions, then the established restrictions will take precedence. Notify the USSTRATCOM Exercise Control Group (ECG) if conflicts are identified.
- d. (U) Use secure telecommunications systems for all exercise-related communications. Communications checks on clear systems, such as HF voice, may be attempted; however, responses will be at the discretion of each unit based on the exercise tactical situation.

(1) (U) Do not discuss or transmit classified information over non-secure systems, such as UHF/HF clear voice; narrow-band, non-secure AFSATCOM; or non-secure phones.	
(2) (U) Do not transmit (b)(1)	
(b)(1) over non-secure systems. (b)(1) Traffic will be injected using secure AUTODIN and addressed to AIG 927 IAW EAP-CJCS, VOL VII, Chapter III, Section D.	re

3. (U) SPECIAL INSTRUCTIONS

- a. (U) KNOCK-IT-OFF Procedures. If real world events require reconfiguration of communications systems, or termination of exercise communications events, exercise players will call "KNOCK-IT-OFF" to:
- (1) (U) Net Control Element or

 (2) (U) USSTRATCOM Communications Officer/NCO (b)(6)

 below for STU-III to Red Switch interface procedures) or

 (3) (U) USSTRATCOM ECG (b)(6)

 (4) (U) Support Battle Staff J6 (b)(6)

 (see para 3.h. below for STU-III to Red

 Switch interface procedures).

 b. (U) Call Signs

c. (U) <u>Satellite Communications Procedures</u>. Satellite procedures will be in accordance with EAP-CJCS, Volume VII; EAP-STRAT, Volume VII; SD 705-1 (Milstar Policy); and command plans and directives.

e. (U) Exercise Markings

(I) (U) Clearly identify all messages as exercise traffic as shown below. Formatted messages (GENSER, etc.) will use the EXER line (●) with GLOBAL GUARDIAN 2001-2 as the exercise name. Additionally, the RMKS line (●), if used, will contain the phrase "EXERCISE GLOBAL GUARDIAN 2001-2" as the first and last line of text. Insert the line (●) "EXERCISE EXERCISE EXERCISE" before and after the message text

- (2) (U) Identify exercise EAMs in accordance with EAP-CJCS, EAP-STRAT, and participating command publications.
- (3) (U) Begin exercise voice traffic with "This is _____, with exercise GLOBAL GUARDIAN 2001-2 traffic." Use the terms "exercise" or "simulated" when referring to exercise events (e.g., "simulated launch"). If at any time message traffic cannot be identified as real or exercise, contact the originator to determine if the information is real or exercise.

f. (U) Simulated Players

- (1) (U) The USSTRATCOM ECG will role-play those agencies not participating in GG 2001-2. Use the telephone numbers in Table 10 to speak to the simulated command or agency.
- (2) (U) To send an AUTODIN message to a simulated player, use the staff routing code section of the message header to indicate the simulated agency. Address message traffic to the plain language addresses (PLA) shown below:

PLA USSTRATCOM OFFUTT AFB NE//J37/ECG/SIM-XXX//

Note: (U) Enter the simulated agency in the field "SIM-XXX", for example, "SIM-USEUCOM."

(3) (U) AUTODIN message traffic from a simulated player will be annotated in the same manner.

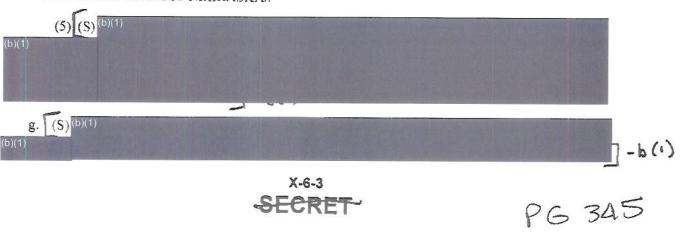

Example:

(4) (U) When an exercise participant is role-playing for another unit (for example, Task Force 144 role-playing for an alert SSBN), address the role-player and identify the simulated player in the routing code section.

Example:

(b)(1)]-6(1)

- h. (U) <u>Special Telephone Instructions</u>. The Headquarters USSTRATCOM Battle and Support Staffs use the Red Switch Multiline Phone (MLP-2) as the primary method of telephone communication. If using a STU-III to call a USSTRATCOM Red Switch MLP extension, use the following procedures:
- (1) (U) The caller must have their STU-III key inserted and tumed. Call Offutt AFB extension is DSN (271-XXXX) or commercial (402-294-XXXX).
 - (2) (U) The STU-III will automatically go into the secure mode.
 - (3) (U) After the STU-III has gone into the secure mode, the caller will hear a recorded message directing them to dial the last 4-digits of the Red Switch (MLP-2) number. The procedure varies depending on the STU-III type of the caller (see chart below).
 - (4) (U) Once the secure mode is established, the MLP-2 will ring.

- 1. (U) The Exercise Control Group (ECG) is the term used for the primary control and simulation cell during GG 2001-2. The <u>USSTRATCOM/NORAD/USSPACECOM ECG</u> and the <u>USSTRATCOM/NORAD/USSPACECOM Intelligence ERC</u> will be located at USSTRATCOM, Offutt AFB, NE. The functions of the ECG and ERC are BLUE force simulation, higher headquarters role playing, exercise message injection, exercise control, and monitoring.
- 2. (U) The ECG/ERC will be simulating or role playing for those areas, commands, or personnel not actively participating in the exercise, as listed in below. Other commands or command posts providing simulation or response cells are also listed. Participants requiring inputs from organizations that do not appear on this list should contact the USSTRATCOM ECG (see Table 9).
- 3. (U) The ECG/ERC will be manned 24-hours/day from STARTEX through ENDEX. Contact the USSTRATCOM ECG/ERC if additional guidance is required.
